

Alexandre BOSSHARD

Coordinator and Project Manager, Pully, Switzerland

Alexandre Bosshard is a member of the head of the Department for industrial services and technical office of the City of Pully. Coordinator of this department and passionate about the projects that make the link between human and technical aspects, he holds a master degree in engineering from the Swiss Federal Institute of Technology in Lausanne (EPFL), a postgraduate in applied psychology SNLP and a certificate in public administration management from the University of Lausanne. Alexandre has also worked for several private companies and organizations for which he has carried out numerous projects in Switzerland and abroad in the field of large infrastructures, environment and geomatic. With more than 20 years of practice in complex and cross-functional projects, he has piloted several smart city projects in the fields of big data, mobility, e-government and open source. He leads the implementation in the City of Pully of the U4SSC KPI's, according to the method developed by the International Telecommunication Union (ITU) and initiated and piloted the writing of "Pully under the microscope".
