

Beniamino GORINI

Chairman, ETSI EE

Beniamino Gorini has achieved the master in Electronic Engineer in 1985 at the University “Politecnico” of Milano, Italy.

Since 1986 he has been working in telecommunication industries starting in Telettra, an Italian provider of telecom equipment, later part of Alcatel group, then Alcatel-Lucent and now Nokia that is a worldwide supplier of telecom products.

He started his work experience in Research & Development department of power units and later he went through positions of EMC compliance manager, Environmental compliance manager, Product quality compliance manager and standardization coordinator of Environmental standards. He is now in charge of the Environmental Compliance laboratories in Nokia Italy and has also the responsibility for the Standardization and Environmental matters.

Since 1989 he has been involved in worldwide standardization bodies focusing on electromagnetic compatibility, electromagnetic field exposure, power supply distributions/interfaces, grounding & bonding, safety, environmental and eco-environmental topics. He has various roles in International Standardization bodies and is currently chairman of the ETSI TC “Environmental Engineering”, chairman of IEC/CISPR SC-A “EMC test instrumentation/methods/measurement uncertainty”, Vice-chairman of ITU-T SG5/WP1, Vice-chairman of ETSI ERM-EMC WG, co-chairman of CEN/CENELEC/ETSI joint WG on Mandate M/462 “Energy efficiency in ITC”.
